For most of the report, I was simply explaining what I have done throughout the project. However, I used it for generating entries in the "Real World Usage" in the "Feature Implementation Details" section. By doing this, I missed on an opportunity to come up with such ideas myself, hindering a chance to think more creatively.

16. Please explain your ratings above, especially if you have AI tools for "other" types of work. *

I only used ChatGPT for generating entries in the "Real World Usage" in the "Feature Implementation Details" section, which essentially summarized the other information in the table and generated ideas for how they can be applied. Considering the scale of the report, this section seemed small, therefore I think I mostly did it, but some contribution by AI.
