1. I used a lot of console.log syntax to view the data getting stored in the variables when I was working on the backend and getting responses from the API. And the code that I wrote wasn't formatted correctly so took chatGPT help to find an remove extra console.log that was used for testing and help in properly formatting the code. And then go over the code again and run it locally to make sure everything was working as expected.

2. Used chat gpt to help figure out the errors for example what the error meant and asked chatGPT to help me understand the error so that I could resolve it. It also provided external links that helped me to understand the error. In some cases I wasn't able to solve the error in that case I took Chat GPT help to find the out the source of the error.

3. The first time I tried to merge my branch with main with a PR I got around 100 conflicts as I messed something up so took chatGPT help to help me sort out those conflicts.
